

Captivate (Modern) Essentials

Course #: AC-104

Duration: 2 days

Prerequisites

None

Details

This comprehensive course on Adobe Captivate (Modern Edition) covers all essential aspects of creating engaging e-learning content. Starting with an introduction to the software and its interface, the course guides learners through project creation, theme customization, and working with slides, blocks, and components. It delves into multimedia integration, including audio and video, and explores various interactive widgets. The course also covers timeline usage, quizzing features, and creating custom interactions with buttons and triggers. Learners will gain hands-on experience with text formatting, image manipulation, and character insertion. The course concludes with instructions on publishing projects, including table of contents creation, ensuring that participants can produce professional, interactive e-learning materials using Adobe Captivate's modern interface.

Software Needed

License to Adobe Captivate (Modern)
