

Critical Thinking

Course #: PD-100 **Duration:** 2 days

Prerequisites

None

Details

Dive into an enlightening exploration of critical thinking, a skill paramount to professional success and personal growth. You will explore topics such as schemata, open-mindedness, and cognitive biases, gaining a profound understanding of how our perceptions shape our thoughts.

The course then moves on to more complex topics such as reasoning, validity versus soundness of arguments, logical thinking, and common logical fallacies. You'll learn to practice active listening, ask probing questions, and effectively organize and evaluate new information. We'll also explore essential characteristics of effective critical thinkers, including objectivity, discipline, humility, and emotional intelligence.

Join us to further equip yourself with the skills to navigate the complexities of today's world as a confident, discerning, and adept critical thinker.
