

Prezi Present Fundamentals

Course #: P-100 **Duration:** 1 day

Prerequisites

None.

Details

Prezi Present is a web-based presentation application and storytelling tool that uses a single, infinite canvas instead of traditional slides. In this course, you will learn how to create non-linear presentations, zoom in and out of a visual map, create topics and subtopics, and differentiate between planets and stacks. You will also learn how to collaborate with others on Prezi presentations and share your Prezis in engaging live presentations, in simple and convenient remote presentations, and on social media.

Software Needed

Prezi Present

Outline
